

ANDERSON STUDIOS

Learning Experience Platform (LXP)

Enterprise Learning
Technology Built Around
Your Organisation

Powered by Moodle.
Enhanced by Anderson Studios.

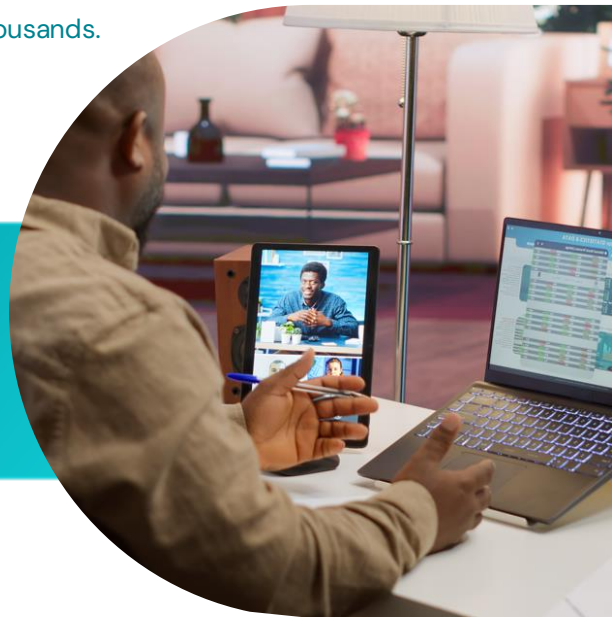

Why Anderson Studios?

More than an LXP

- ✓ **Customise** your platform to your organisation.
- ✓ **Connect** your LMS to existing systems.
- ✓ Access **support** that hosts, manages and secures your platform.
- ✓ **Scale** seamlessly from hundreds to thousands.

A learning platform built around **your organisation**, not the other way around.

Customisable

Tailor the platform to your organisation, from learner journeys and learning pathways to workflows, assessments, enrolment and reporting.

Supported

A fully hosted SaaS solution with enterprise-grade security, daily management and ongoing support — so you can focus on learning, not technology.

Connected

If a system has an API, we can integrate it. We develop custom APIs and middleware integrations to connect the LXP with existing systems.

Scalable

Designed to grow with you, supporting anything from hundreds to thousands of learners across corporate, higher education and professional learning environments.

While helping you expand your learning business, reach new audiences and generate revenue through integrated e-commerce and online sales.

The Anderson Studios Advantage

We are not simply an LXP provider.

We are learning architects, instructional designers, software developers, system integrators and digital learning specialists.

Our team designs and builds learning ecosystems that combine technology, pedagogy, compliance, analytics and learner engagement into a single scalable solution.

Anderson Studios LXP

Customised. Supported. Integrated. Scalable.

Powered by Moodle.
Enhanced by Anderson Studios.
